Bryan Reynolds was polite with his answer ... Phase 2 voting will last four days, concluding at 2 p.m. Thursday. The starting teams will be announced at 9 p.m. Thursday on ESPN.

This series of resources provides comprehensive support for the Framework for Teaching Mathematics for Year 9, with particular emphasis on a three part mathematics lesson. The materials are fully linked to Key Maths and address the beginning and end of the typical lesson structure outlined in the Framework. The activities within the packs provide a variety of presentational models including opportunities for interactive oral work, direct teaching and paired or group activity work to encourage pupils to engage in mathematical conversation. The packs allow teachers to build resources such as number cards and fans. A wide range of data sets, graphs, tables and examples are included for photocopying or use on an OHP.

Corpus Linguistics for Translation and Contrastive Studies provides a clear and practical introduction to using corpora in these fields. Giving special attention to parallel corpora, which are collections of texts in two or more languages, and demonstrating the potential benefits for multilingual corpus linguistics research to both translators and researchers, this book explores the different types of parallel corpora available, and shows how to use basic and advanced search procedures to analyse them: explains how to compile a parallel corpus, and discusses their uses for translation purposes and to research linguistic phenomena across languages; demonstrates the use of corpus extracts across a wide range of texts, including dictionaries, novels by authors including Jane Austen and Mikhail Bulgakov, and newspapers such as The Sunday Times; is illustrated with case studies from a range of languages including Finnish, Russian, English and French. Written by two experienced researchers and practitioners, Corpus Linguistics for Translation and Contrastive Studies is essential reading for postgraduate students and researchers working within the area of translation and contrastive studies.

A variety of stimulating, curriculum-correlated activities help learners succeed in the 5th grade math classroom, and teacher support makes it easy to implement mathematics standards. Geometry offers narrow focus on the concepts and skills that help develop a strong foundation in mathematics. Valuable pre- and post-assessments aid teachers in individualizing instruction, diagnosing the areas where students are struggling, and measuring achievement.

The volume contains a selection of papers, both theoretical and empirical, from the European Society for Translation Studies (EST) Congress held in Copenhagen in September 2001. The EST Congresses, held every three years in a different country, reflect current ideas, theories and studies covering the whole range of "Translation", both oral and written, and the papers collected here, authored by both experienced and young translation scholars, provide an up-to-date picture of some concerns in the field. Topics covered include translation universals, linguistic approaches to translation, translation strategies, quality and assessment issues, screen translation, the translation of humor, terminological issues, translation and related professions, translation and ideology, language brokering by children, Robert Schumann's relation to translation, directionality in translation and interpreting, community interpreting in Italy, issues in interpreting for refugees, notes in consecutive interpreting, interpreting prosody, and frequent weaknesses in translation papers in the context of the editorial process.

Voyage is a French course with grammar and progression at its heart designed to help teachers cover all the requirements of the National Curriculum. The course provides clear explanantions and a variety of practice activities, making learning and teaching easier. It fully integrates differentiation to meet the needs of a wide-ability range and includes regular assessments such as end-of-unit tests at Key Stage 3 and examination practice at Key Stage 4. It addresses the information and communication technology component of the National Curriculum.

This comprehensive course is designed for intermediate to advanced students of Arabic at upper undergraduate level. It uses authentic materials and a wide variety of techniques to develop the four basic language skills of reading, writing, speaking and listening. Each of the twenty chapters is designed around a particular topic relating to the culture, history, politics, geography or society of the Arab Middle East, to give students an insight into important aspects of the region.
