Aquaculture

Technology And

Recirculating  
aquaculture systems

(RAS) typically consist  
of advanced indoor,

tank-based systems in  
which fish are grown

under very controlled  
conditions. The

technology utilises  
mechanical and

biological filters to

reuse the water, passing  
it through treatment

# Access Free Aquaculture

processes to remove  
organic waste and keep  
the high water quality  
intact.

## Adding

~~RAS~~ recirculating  
aquaculture systems +  
BioMar

Recirculating  
aquaculture systems are  
used in home aquaria  
and for fish production  
where water exchange is  
limited and the use of

# Access Free Aquaculture

biofiltration is required to reduce ammonia toxicity. Other types of filtration and environmental control are often also necessary to maintain clean water and provide a suitable habitat for fish. The main benefit of RAS is the ability to reduce the need for fresh, clean water while still maintaining a healthy
