Constellation Map Constellation maps divide the celestial sphere into 88 parts, known as constellations, helping astronomers locate stars and deep sky objects. The star constellations that can be seen in the night sky depend on the observer's location and season, and they change throughout the year.

Constellation Map / Constellation Guide
Sky Map Online web app provides free, printable & interactive sky charts for any location, time and viewpoint. It shows the night sky stars up to magnitude 12, planets and DSO.

Sky Map Online
Astronomical map, any cartographic representation of the stars, galaxies, or surfaces of the planets and the Moon. Modern maps of this kind are based on a coordinate system analogous to geographic latitude and longitude. Most modern maps are compiled from photographic observations made either from Earth or from space.

Celestial cartography, uranography, astrography or star cartography is the fringe of astronomy and branch of cartography concerned with mapping stars, galaxies, and other astronomical objects on the celestial sphere. Measuring the position and light of charted objects requires a variety of instruments and techniques. These techniques have developed from angle measurements with quadrants and the unaided eye, through sextants combined with lenses for light magnification, up to current methods whic

Celestial cartography - Wikipedia
Description: Rare double-hemisphere celestial map based on Blaeu. The smaller charts compare the classical geo-centric and modern helio-centric models of the solar system.

Celestial Maps - Customworks
The "Cosmos in Miniature: The Remarkable Star Map of Simeon De Witt" exhibition showcased the astronomical accomplishments of De Witt, a surveyor to George Washington and the Continental Army. The exhibition focused on De Witt's "astrolabe" of 1780, a small, circular map of the stars that were visible from his New Jersey post.
