Geology is the  
primary Earth  
science. The word  
means "study of the  
Earth." Geology deals  
with the composition

# Download Ebook Earth

of Earth materials, Earth structures, and Earth processes. It is also concerned with the organisms of the planet and how the planet has changed over time. Geologists search for fuels and minerals, study natural hazards, and work to protect Earth's environment.

Science provides an overview of how science affects our environment. We focus on interactions between the solid Earth, its water, its air and its living organisms, and on dynamic, interdependent relationships between these four components. Earth

# Download Ebook Earth

and environmental scientists also consider how these relationships produce environmental change at different timescales.
