EPICS Application Developer's Guide

This repository contains the LaTeX text of the EPICS Application Developers Guide, and older versions of the Channel Access Protocol Specification. The master version of the latter has now been converted to a restructured text file in the specs directory of the epics-docs repository on GitHub. The Makefile in this directory generates both HTML and PDF versions of the Developers Guide and can rsync them into a directory set by the INSTALL_DIR variable. make all will generate the files, make ...

IOC applications. It contains: Instructions for creating, building, and running an example IOC application. Instructions for creating, building, and executing example Channel Access clients. Briefly describes iocsh, which is a base supplied command shell. ...

EPICS Application Developer's Guide - Getting Started

The `ld` command in the startup script loads EPICS core, the record, device and driver support the IOC needs, and any application specific modules that have been linked into it. `dbLoadDatabase` loads database definition files describing the record/device/driver support used by the application.. `dbLoadRecords` loads record instance definitions.

EPICS Application Developer's Guide - IOC Initialization

The Experimental Physics and Industrial Control System (EPICS) comprises a set of software components and tools that can be used to create distributed control systems. EPICS provides capabilities that are typically expected from a distributed control system: Remote control & monitoring of facility equipment Automatic sequencing of operations
