American business folklore is awash with the adventures of successful entrepreneurs. Still, most of these stories are about Americans, neglecting important and courageous entrepreneurs from other countries. *Made in Korea* recounts the story of how Chung Ju Yung rose from poverty to build one of the world's largest and most successful building empires - Hyundai - through a combination of creative thinking, tenacity, timing, political skills, and a business strategy that few competitors ever understood. Chung entered the shipbuilding business with no experience and went on to create the world's largest shipyard. He began making automobiles when foreign experts unanimously predicted he would fail, and he started a global construction company that has built some of today's greatest architectural wonders. He even convinced the International Olympic Committee to select South Korea over Japan as the site for the highly successful 1988 Olympics. Unlike most CEO's of major firms, Chung has always preferred the company of his workers to that of the global executive elite. Hard work, creativity and a capacity to never give up - this is the essence of Chung's life. In each of his ventures, he exhibited a sheer determination to succeed, regardless of the obstacles, and he worked tirelessly to instil this drive in all of his employees. Even today, in the midst of Korea's worst economic crisis in over four decades, Chung's company is busy implementing plans to emerge as an even stronger contender in the world economy. Illustrated with 32 pages of colour photographs not previously seen in the West, including photos of Chung's recent historic visit to North Korea in 1998, *Made in Korea* takes stock of Chung's entire life, highlighting both his contributions to society and the lessons his work can teach to aspiring entrepreneurs.

Lying is an intrinsic part of our social fabric, but it is also a deeply problematic and misunderstood aspect of what makes us human. Ian Leslie takes us on a fascinating journey that makes us question not only our own relationship to the truth, but also virtually every daily encounter we have. On the way he dissects the history of the lie detector, how parents affect their children's attitude to lying (and vice versa), *Who Wants to Be a Millionaire?*, the philosophical ambiguity of telling the truth, Bill Clinton's presentational prowess, Wonder Woman's lasso of truth, and why we should be wary of anyone with more than 150 Facebook friends. *Born Liars* is thought-provoking, anecdotally driven narrative nonfiction at its best. Ian Leslie's intoxicating blend of anthropology, biology, cultural history, philosophy, and popular psychology belies a serious central message: that humans have evolved and thrived in large part because of their ability to deceive.

The use of comparisons to explain, analyze and understand social and economic phenomena is recognized as a valuable social science tool. This textbook deals with the differences in management and organization between nations and their effects on multinational enterprises. In comparing management practice across the world, the authors cover themes such as national cultures, diversity and globalization. Students are guided through the key business disciplines, providing a broad

introduction to the field and including truly global coverage. With student and instructor friendly resources such as chapter summaries, mini-case scenarios, larger case studies and power-point slides, this book is core reading for students of international business and international management.

This truly comparative text takes a fundamental, biophysical approach toward animal physiology. Students majoring in zoology, biology, or premedicine will study animals ranging from simple invertebrates and protozoans to complex multicellular invertebrates and vertebrates. Emphasis on evolution shows the progressive changes, modifications, and developments of physiological systems from simple to complex animals. Comparisons show the similarities and differences in how animals function, but stress fundamentally similar adaptations in very different animals.

Annotation This revised edition of the bestseller reflects the realities of the new high-tech marketplace where effective marketing strategy counts as much as the latest technology. New material includes case studies on how high-tech giants came out of the tech market meltdown stronger and more competitive.
