Given r , let a be the closest integer to r less than r , and let b be the closest integer to r greater than r . In the notation introduced in Section 1.8, $a = \lfloor r \rfloor$ and $b = \lceil r \rceil$. In fact, $b = a + 1$. Clearly the distance between r and any integer other than a or b is greater than 1 so cannot be less than $1/2$.
