The easiest way to install the Audience Targeting app is via Liferay Marketplace. Make sure to install the correct version of the app. Choose CE if you 're running Liferay CE and EE if you 're running Liferay EE. If you 're running Liferay on JBoss, make sure to have your jboss-deployment-structure.xml file configured correctly.

Installation and Uninstallation – Liferay Help Center

Simply select the Ant tab in your perspective and then click the Ant icon with the + symbol. Note that each directory within Liferay contains its own build.xml file, which Ant reads. When clicking the Ant icon, select the build.xml file within the portaldirectory. Your Ant setup should look like Figure 2.3.

Liferay Portal Setup Guide

They come pre-configured with a running Liferay instance that can be used immediately to explore all of the things that Liferay can do. Bundles are the fastest way to create full production-ready Liferay installations. If you 're using a bundle, skip to the section on the setup wizard below to continue your installation.

Installing a Bundle – Liferay Help Center

These include connecting to a database, declaring the location of the Liferay Home folder, and changing how users authenticate (by screen name instead of by email address). By convention, portal-ext.properties should be created in your [Liferay Home](./liferay-home.md) folder or [USER_HOME] folder to override default property values. You must ...

Install Java 8. The first step in Liferay 7 installation is to install Java. Since, Liferay 7 is compatible with Java 8 (and higher version) only, you need to install Java 8 first. Liferay took this decision to use all latest features of Java. Also Oracle has announced to stop any further support for Java 7.
